

silk

Shop smoothly.

From wishlist to checkout, Silk helps shoppers declutter their digital lives, uncover savings, and take control of their shopping data — unlocking a high-margin, multi-billion opportunity to shape the future of consumer eCommerce.

Shop smoothly.

The problem

Consumers are getting lost
in the maze and noise of
online shopping.

Online shopping is broken.

- Inboxes are overrun with shopping spam.
- Digital experiences are flawed: multiple browser tabs, screenshots, texts/emails to curate and remember products of interest.
- Merchants and advertising platforms deliver biased recommendations.
- Complexity is exponential when consumers shop across multiple merchants - options, offers, order management, returns

Silk's solution

Silk provides an AI-powered consumer-first platform to:

Save time.

Declutter and organize shopping emails (orders, returns, and promotions) on *Silk Shopping Dashboard*.

Save money.

Promotions/sales for favorite products and merchants aren't lost. Returns aren't missed.

Make better purchase decisions.

Save, curate, and share product purchase options across all stores using *Save to Silk* browser extension and mobile app.

Curate bespoke recommendations.

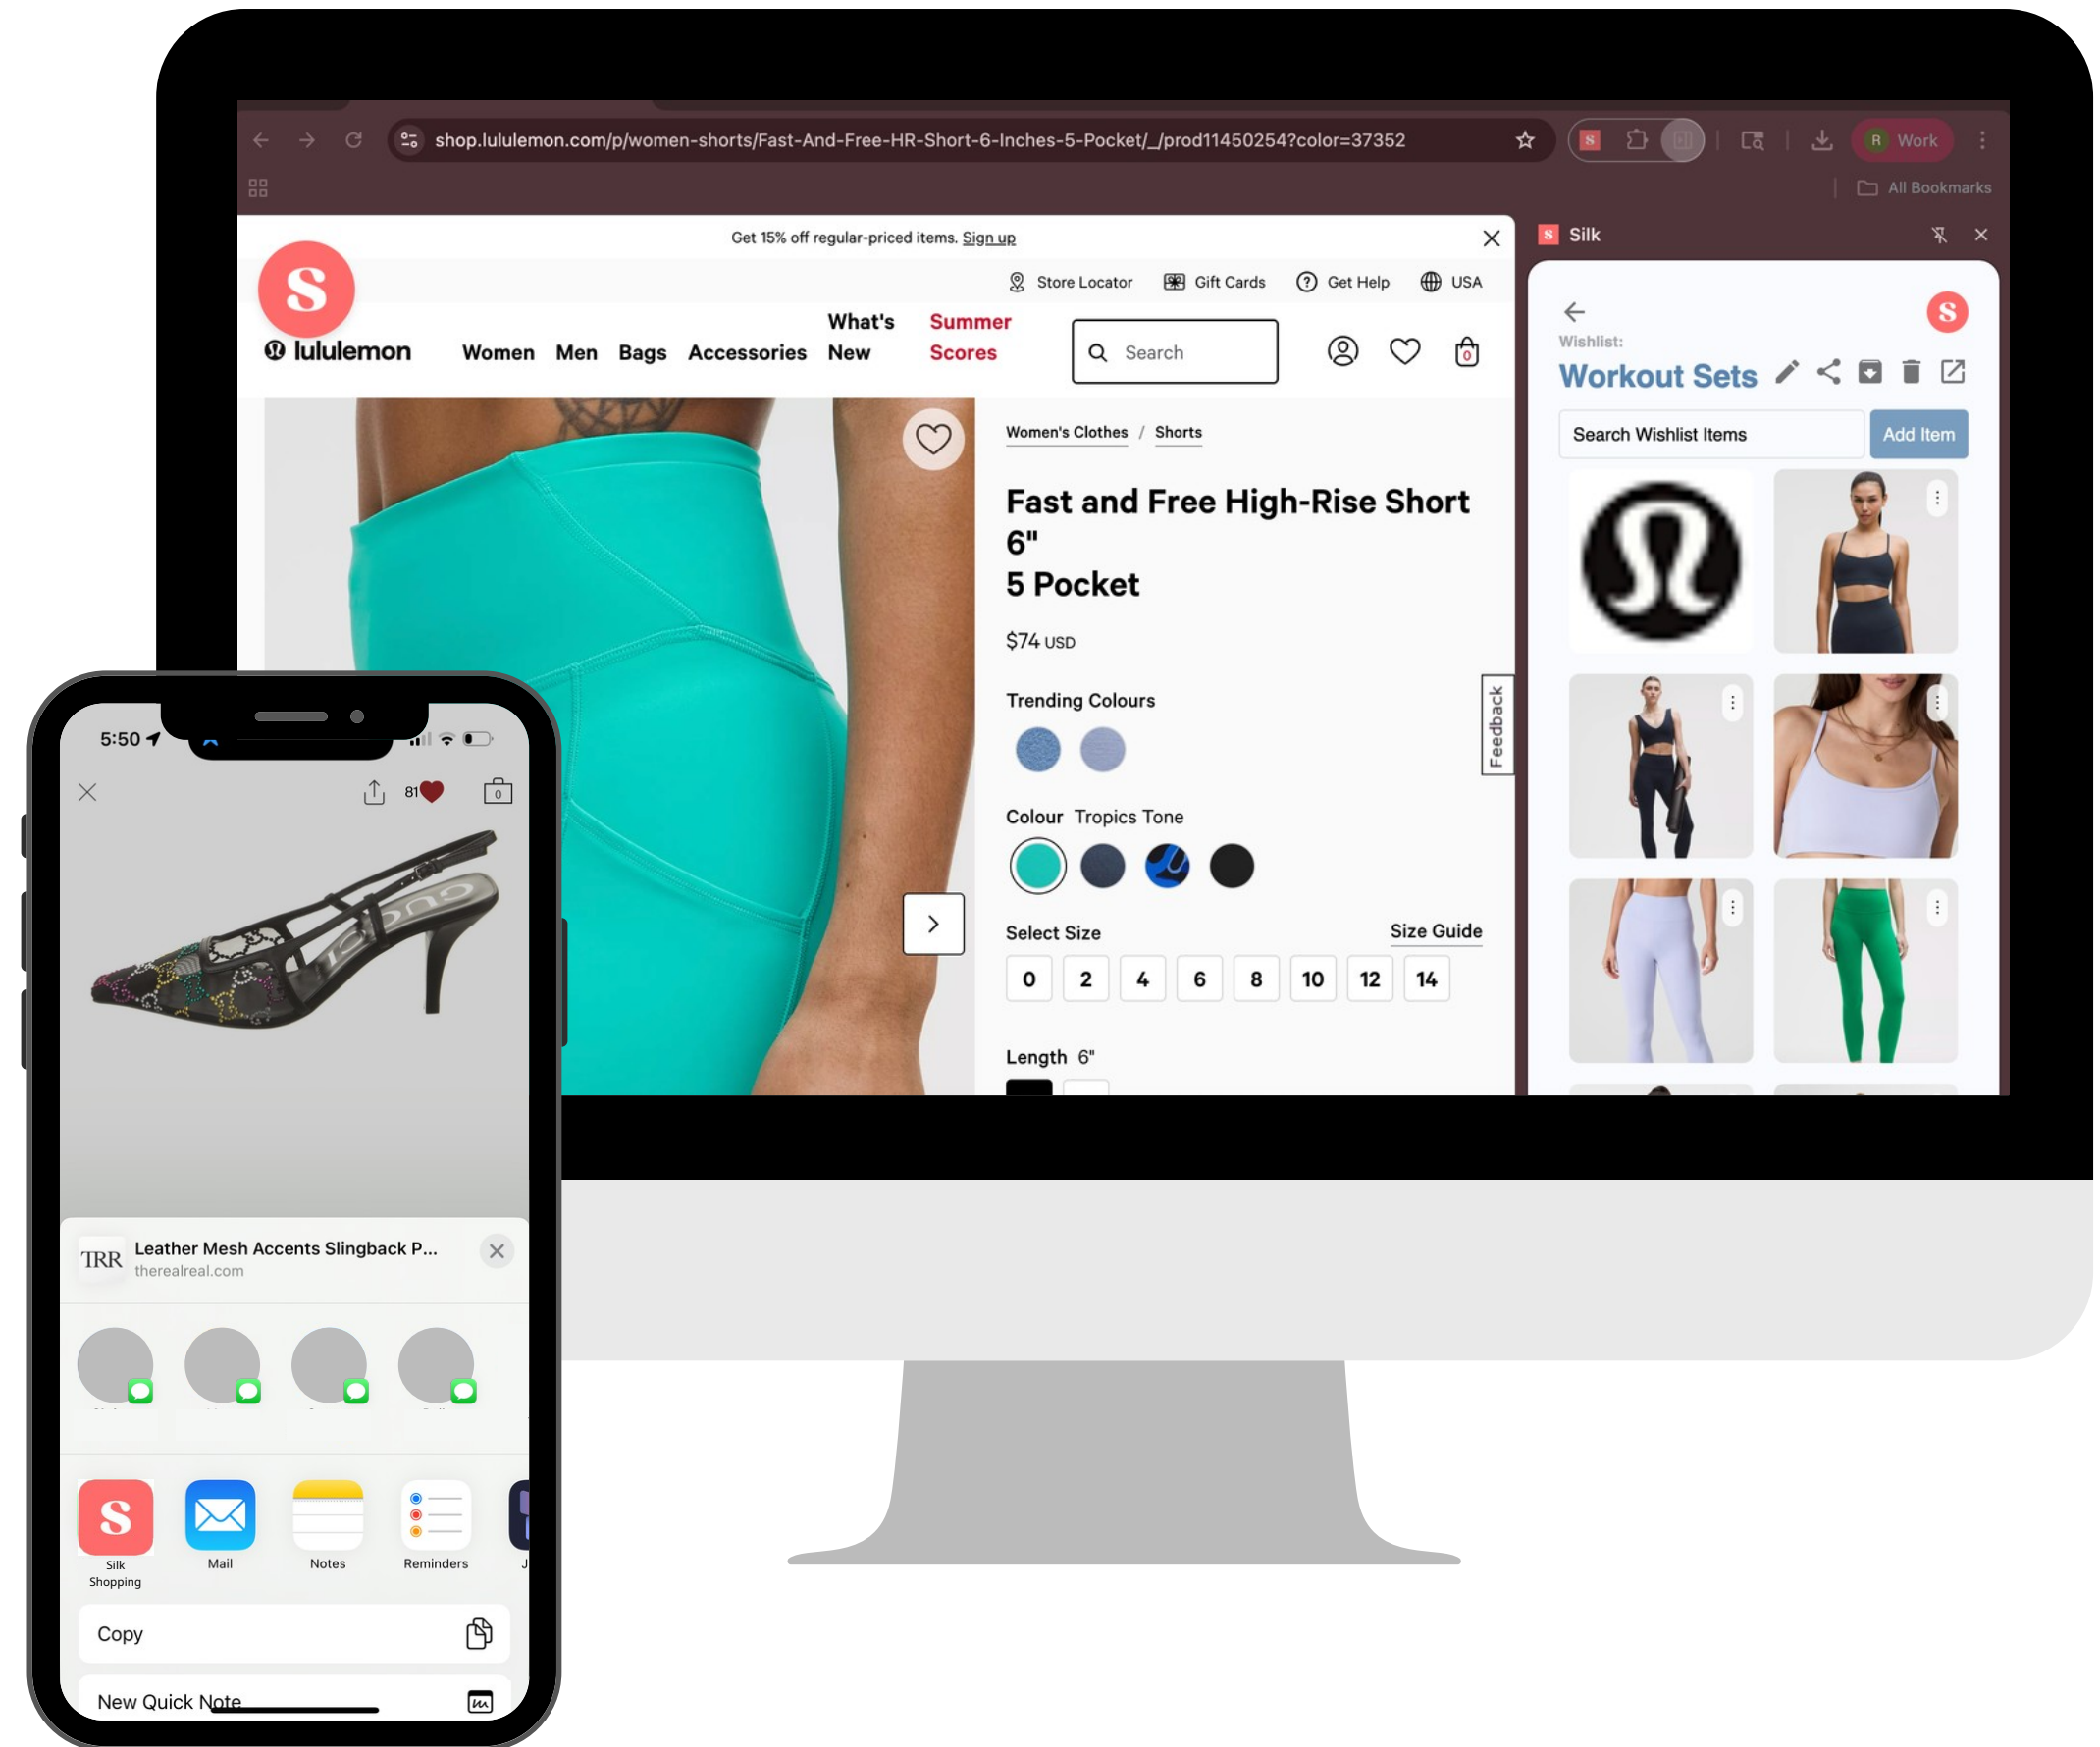

By combining purchase history (emails) with future purchase intent (wishlists) Silk unleashes the power of shoppers' personal *shoppingDNA*.

silk

shopping co-pilot

**Everywhere a user shops —
zero chaos, all convenience.**

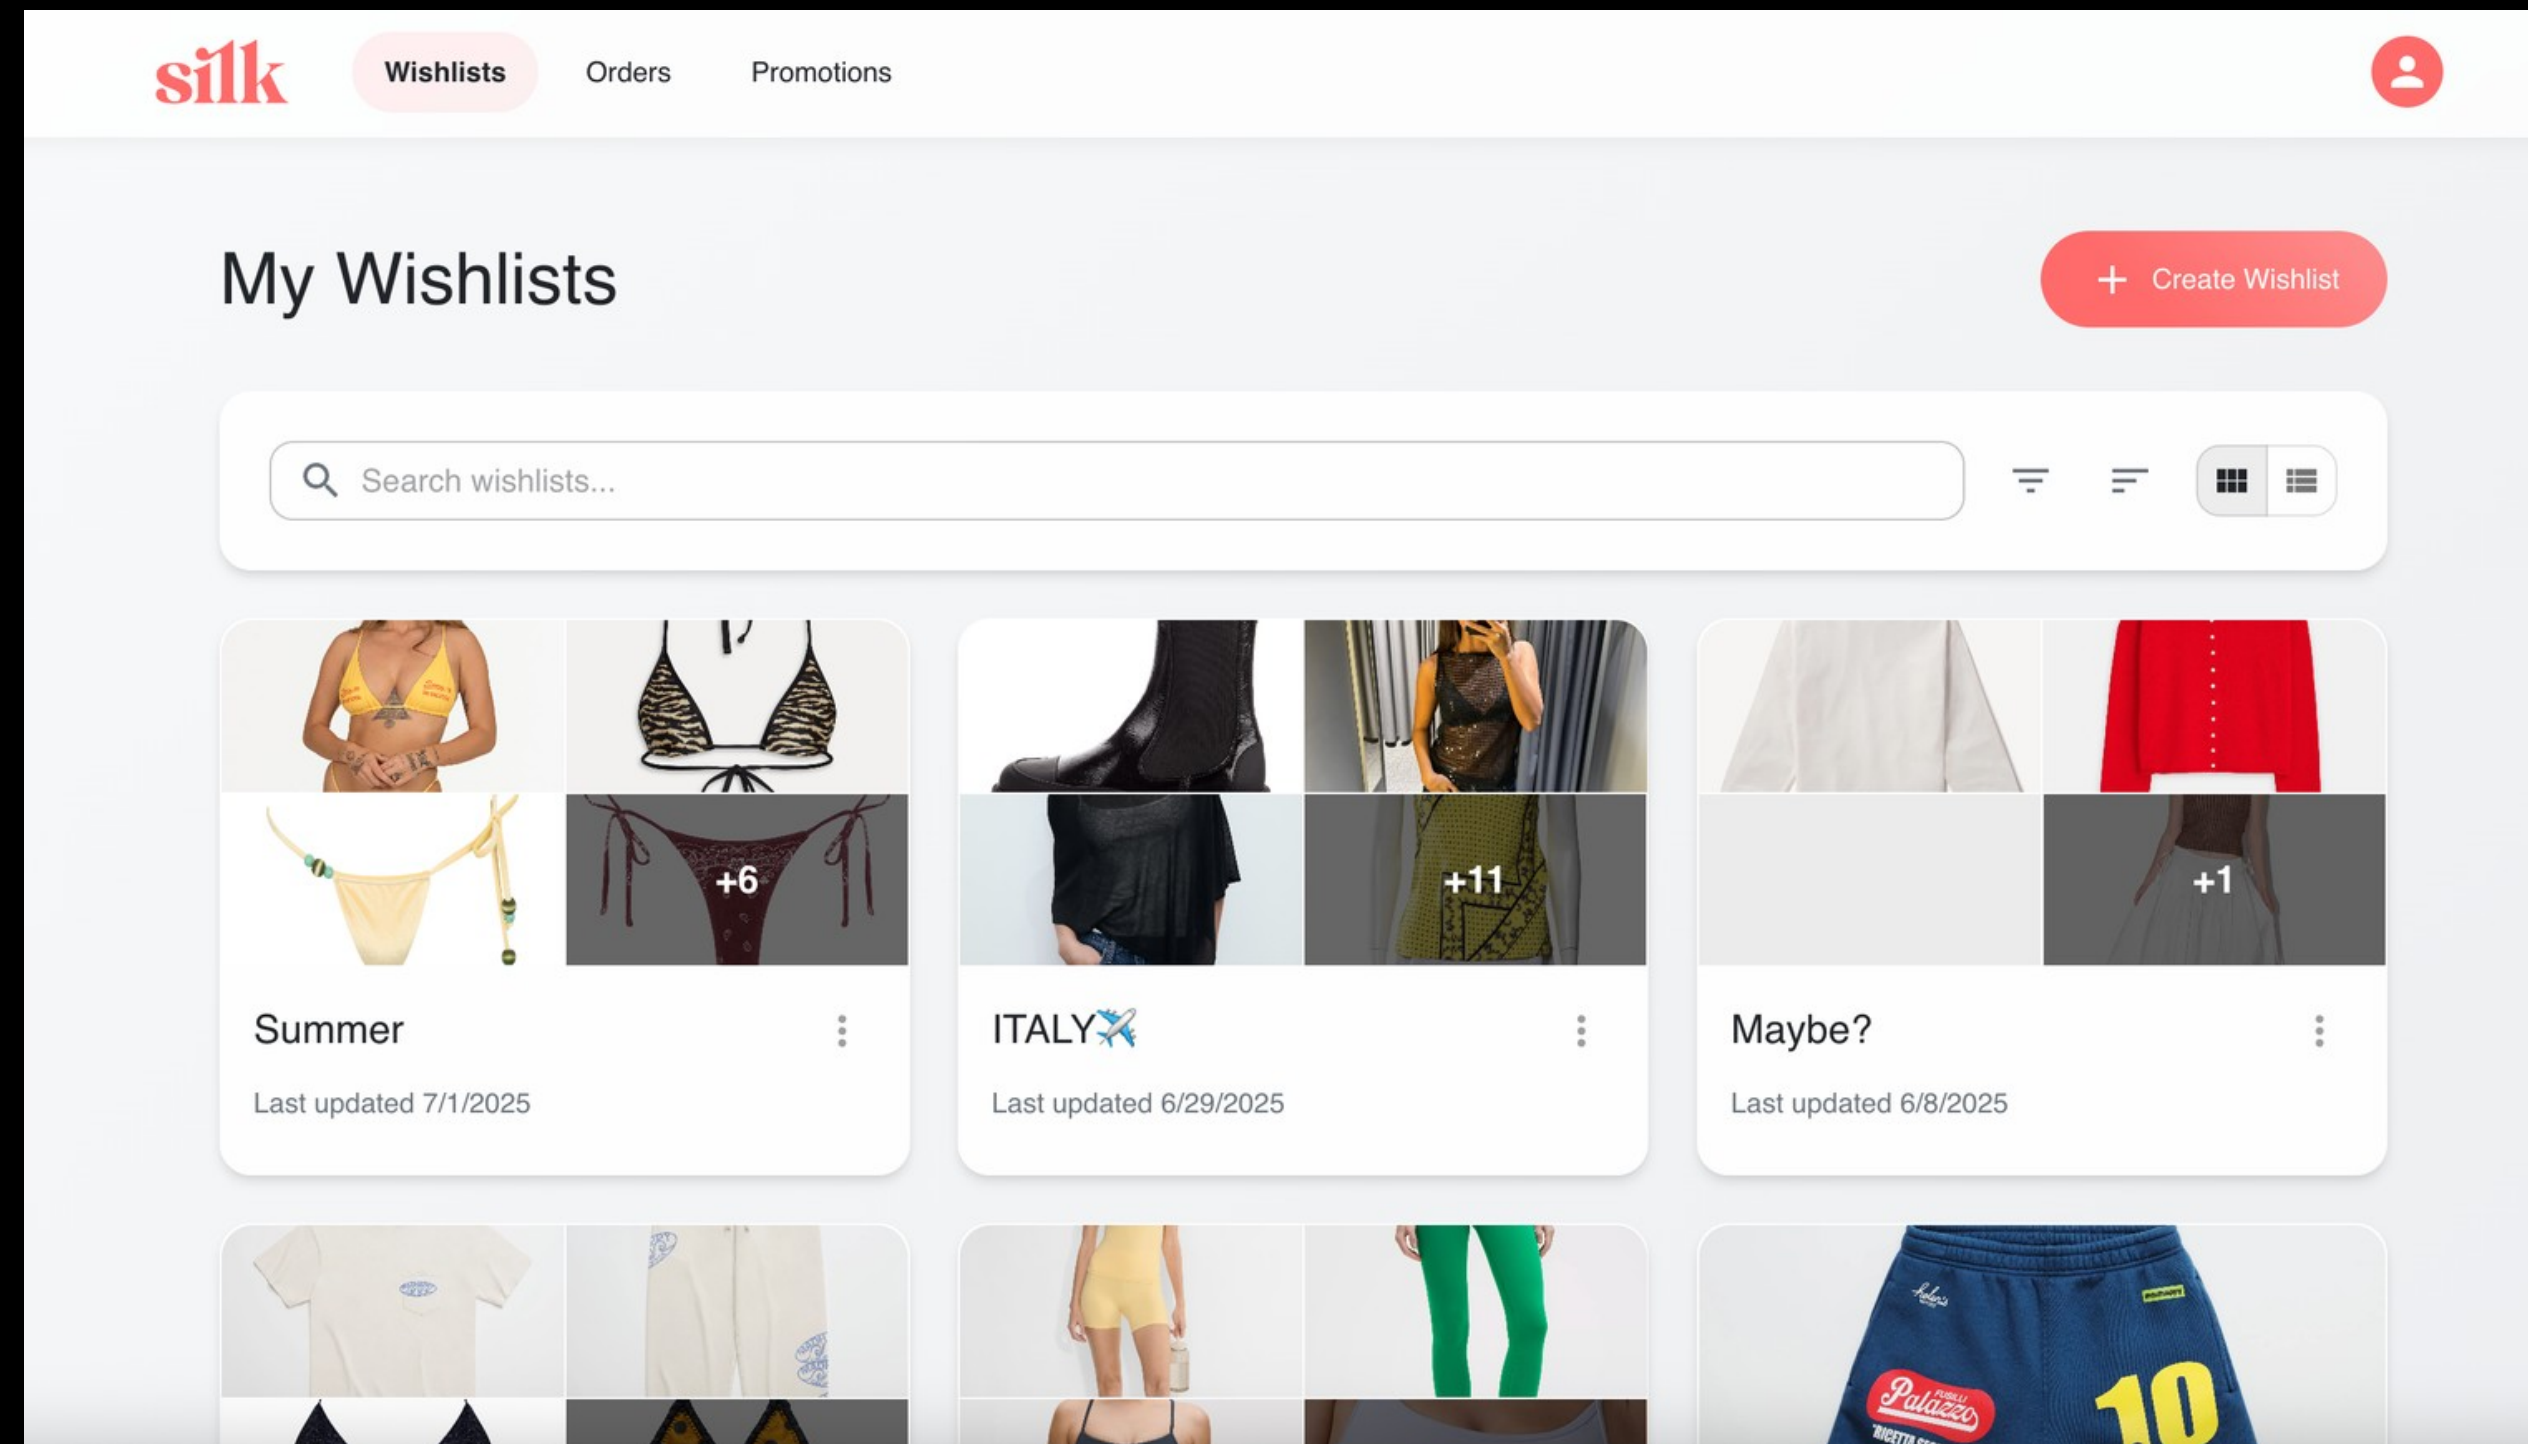

Silk empowers consumers to
use AI on their personal data
to save time and money and
spark joy.

Shop smoothly.

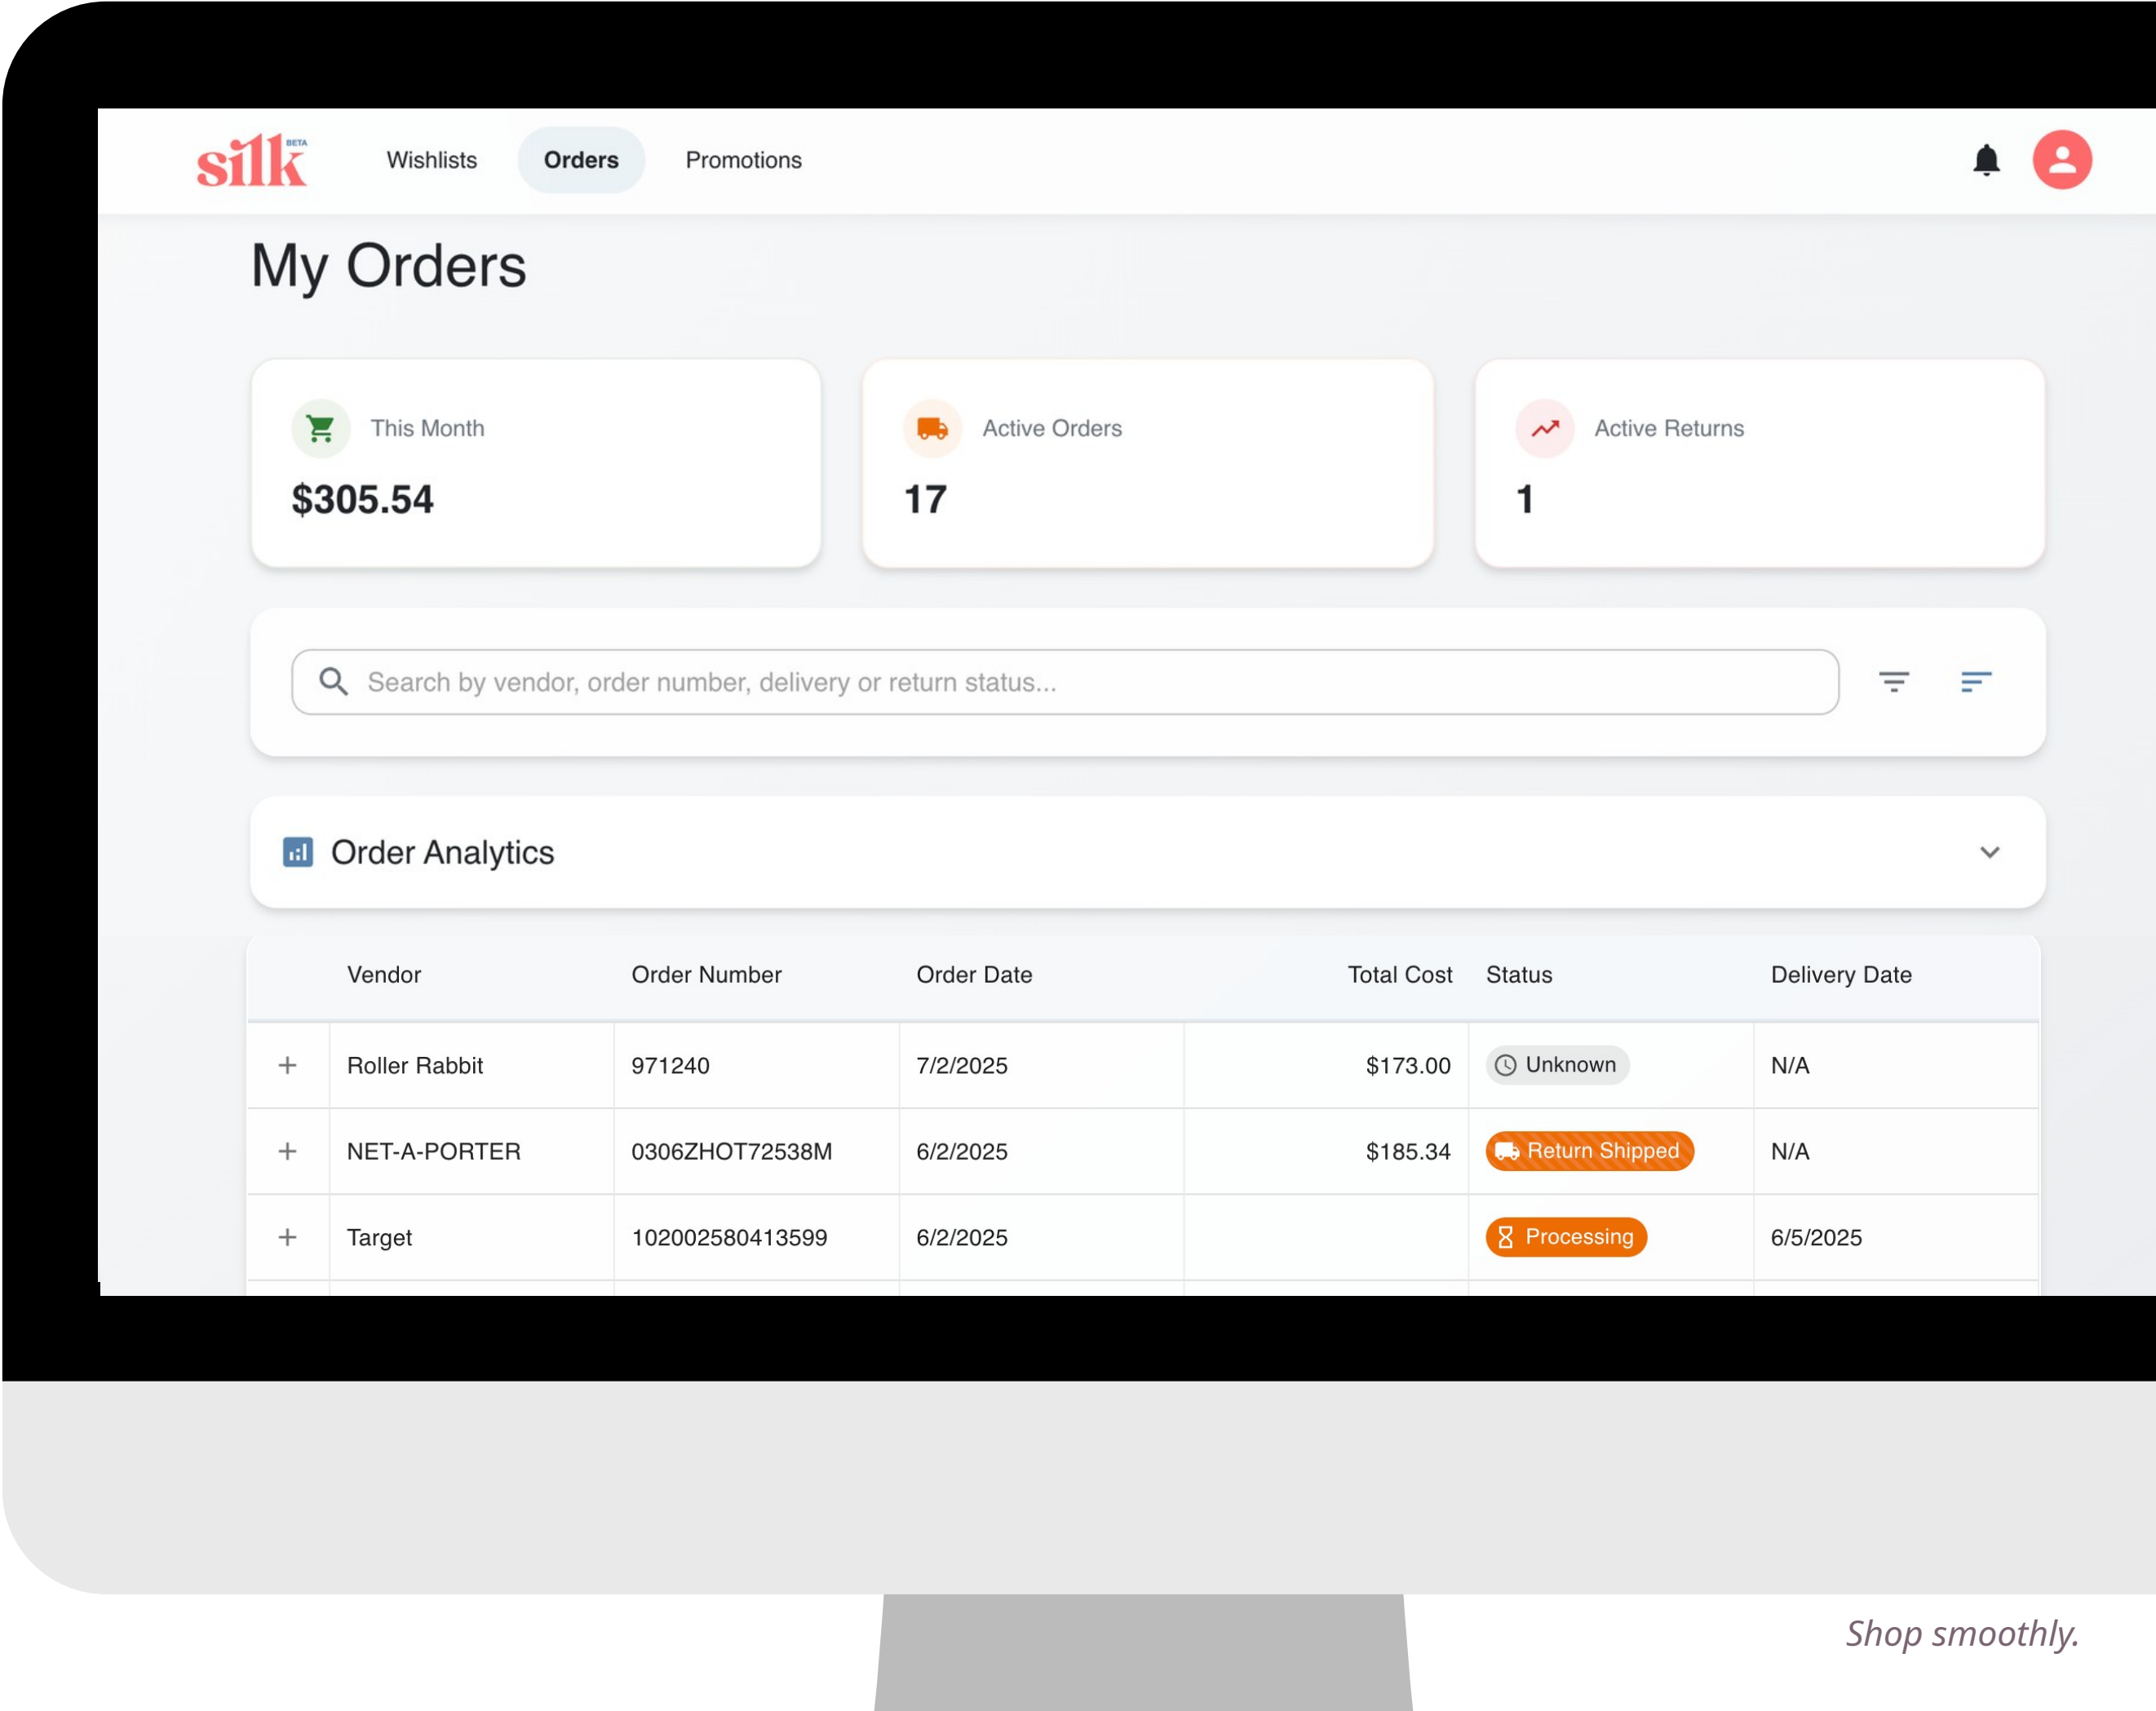

Wishlists

All your items, in one place. Leave the open tabs behind with Silk's shareable, buyable wishlists.

Orders dashboard

Never miss a return again. Silk instantly tracks and notifies you about current returns and orders.

Promotions dashboard

Instant inbox organization. Promotions, sales, and vendor updates are categorized how you want.

Market opportunity

With a TAM of 280M U.S. online shoppers, Silk aims to capture the upper segment of these consumers, presenting a multi-billion dollar opportunity.

\$1.1T B2C market in North America.

Growing rapidly, CAGR of 10.2% a year.

The average U.S. consumer spends \$5K annually online.

The top 10% of shoppers comprise 50% of total spend. Silk is targeting these “power shoppers”. 28M users × \$5k = \$140B SAM

Silk will monetize 1+% power shoppers' spending.

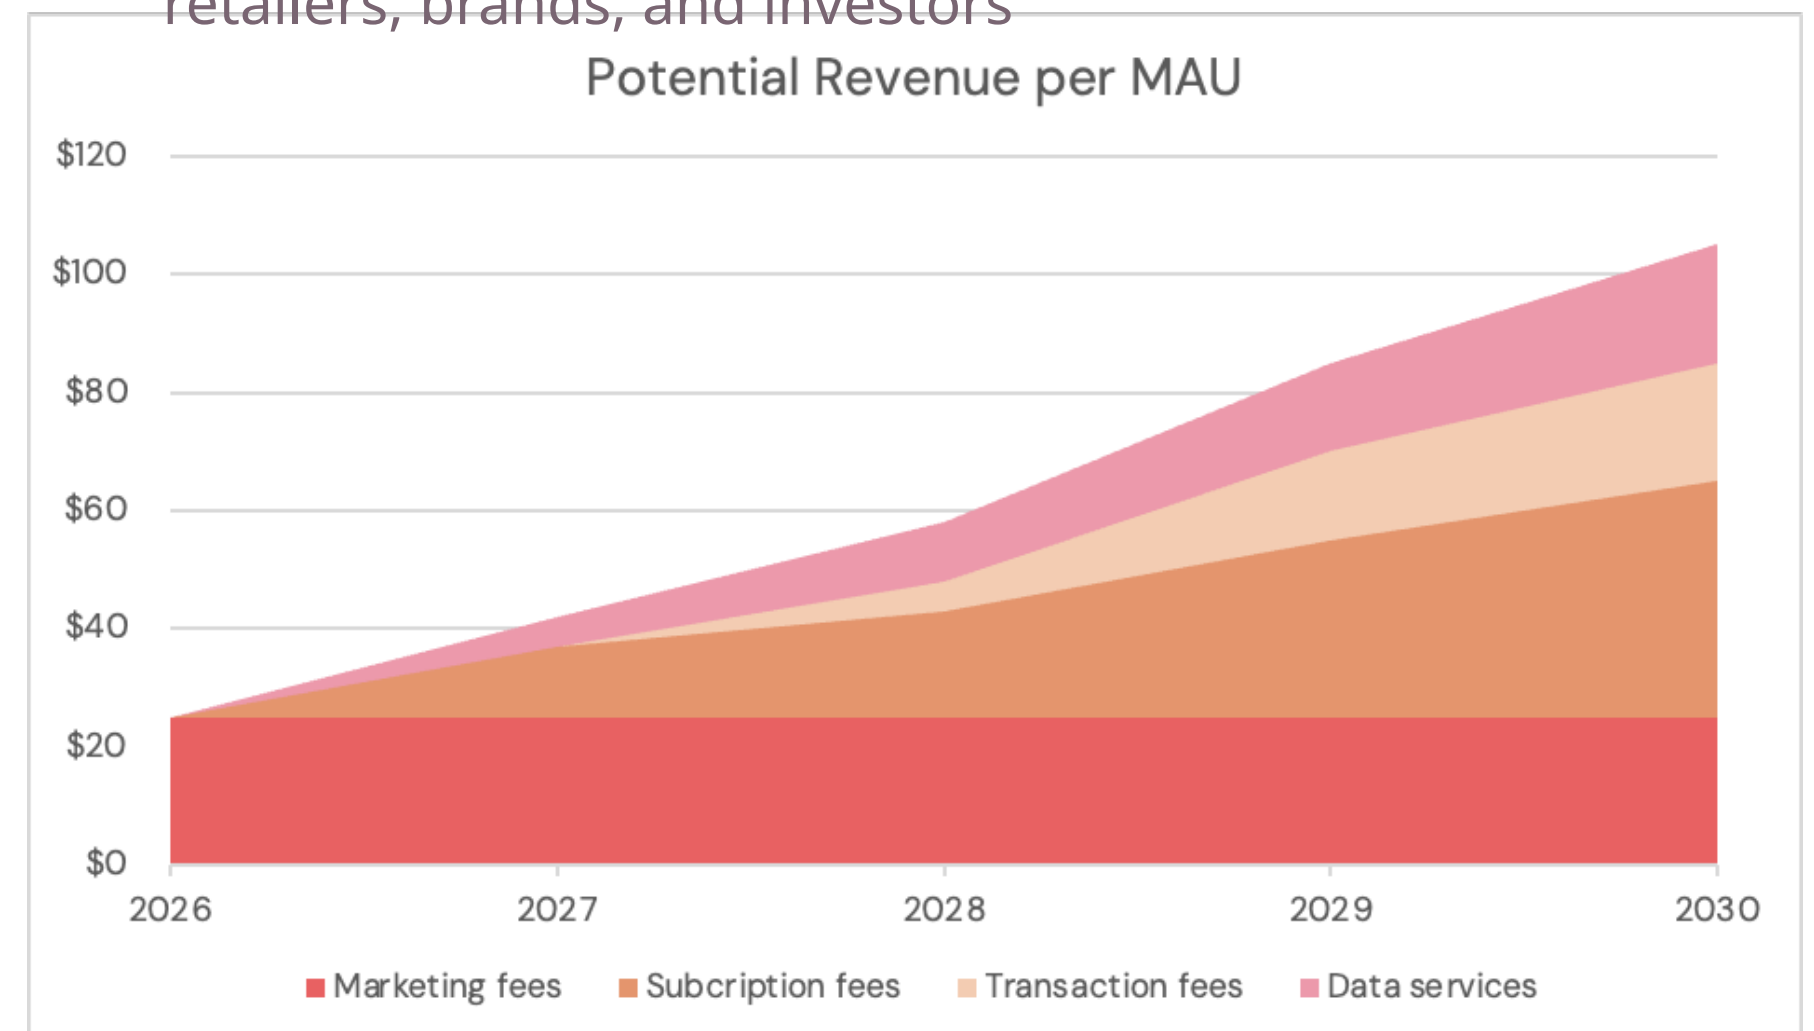

0.5M users by 2030 @ \$100/MAU

Business Model

Silk's target customers are the power online shoppers who spend more than the U.S. average of \$5K per year. Silk will monetize these users in multiple ways, including marketing and transaction fees, premium subscription services, and data intelligence.

Revenue Streams (Phased Approach)

- **Affiliate & Conversion Fees:** Actionable email promos and wishlist re-engagement
- **Subscriptions:** Return tracking, credit alerts, smart insights
- **Transaction Fees:** Direct order placement across merchants
- **Data Intelligence:** Actionable insights for shoppers, retailers, brands, and investors

Projections

Targeting 70%-80% gross margins
& 20% net income by 2030

	2027	2028	2029	2030	2031
Monthly active users	8,000	40,000	120,000	250,000	420,000
Items listed	100,000	600,000	2,100,000	5,100,000	10,100,000
Revenue					
\$ per MAU					
Affiliate marketing fees	\$25	\$25	\$25	\$25	\$25
Subscription fees	\$0	\$1	\$1	\$30	\$40
Transactions fees	\$0	\$0	\$8	\$1	\$20
Data services	\$0	\$5	\$1	\$5	\$20
Total Revenue	\$22	\$38	\$59	\$85	\$100
Total Revenue	\$176,000	\$1,520,000	\$6,600,000	\$20,500,000	\$42,000,000

Growth strategy

01

Direct to consumer

Leveraging social media:

- Viral guerilla content marketing
- Paid ad campaigns
- Existing influencers & platforms
- College campus ambassadors

02

Leveraged partner distribution

White label products and/or tight integration of value-added services:

- Financial providers
- eCommerce platforms
- Fulfillment providers
- Publishers

03

Consumer to consumer

Shareability - wishlists can be shared to other users

- Prompts others to join platform for visibility
- Community in a landscape of disparate consumer experiences
